Stéphane Goujon

3D Sculptor/Modeler. Born 09.05.1995 in Rennes, France.

I wish to contribute to the film industry with my designs, collaborating with others to push projects as far as possible. Specialized in character modeling and hair/fur grooming, my abilities extend to concept art, texturing, lighting, animating and compositing. From a young age, I have had a strong love for storytelling and this has pushed me to learn and broaden my skills in drawing, digital sculpting, painting and photography. My other passions include playing music, adventuring to the many parts of the world, eating exotic foods, skiing and surfing. At the end of the day I always feel the urge to do what matters to me the most: create.
